# Team Reflection w9

Sony Walkman WM-FX 199

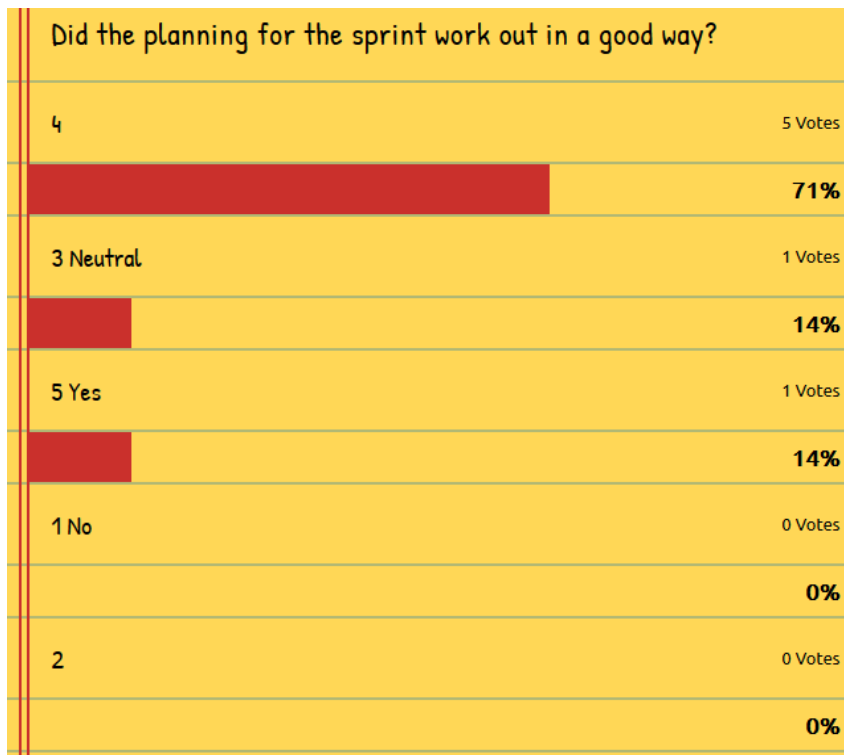

Customer Value and Scope
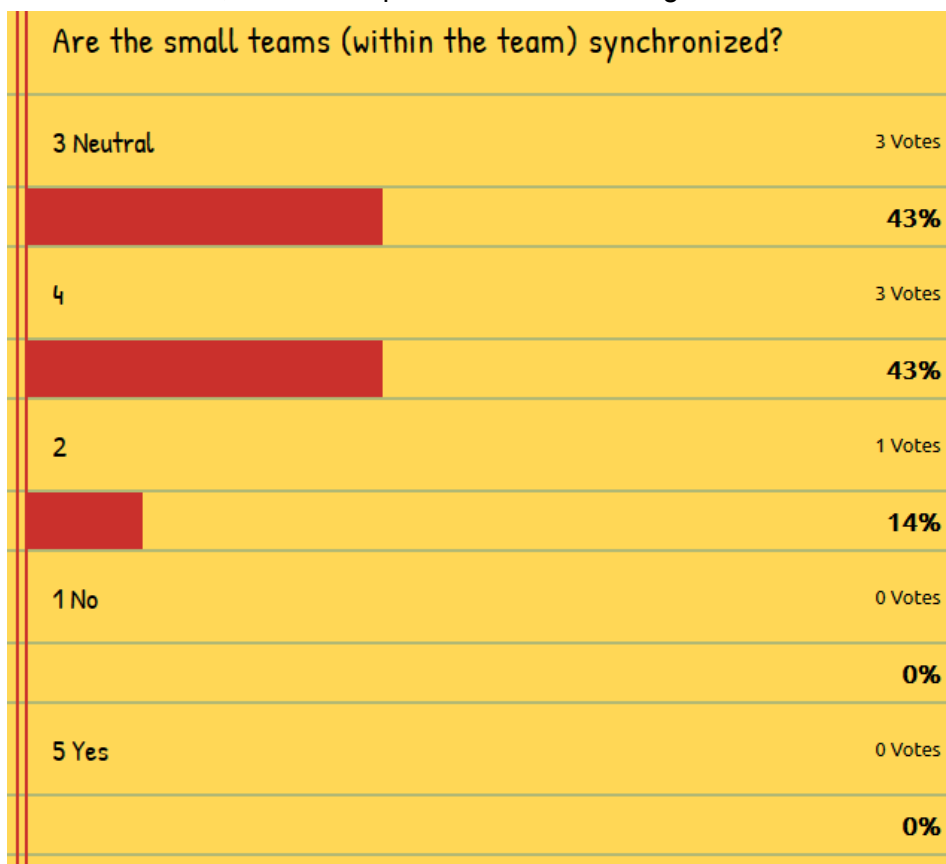

- the three KPIs you use for monitoring your progress and how you use them to improve your process

Are you satisfied with the work in this sprint?

-
  - We are all pretty satisfied with our work this sprint. It appears that everyone has been able to complete their tasks which is nice.

Did the planning for the sprint work out in a good way?

- ○ Planning for this sprint was easier since a lot of planning was already done last week, since this sprint was 2 weeks long.

Are the small teams (within the team) synchronized?

- ○ The two frontend teams are dependent on the backend team, which can lead to some downtime if the backend is not done with functionality that the frontend requires to be implemented.

Application of Scrum

- the roles you have used within the team and their impact on your work
    - The roles are the same as last week's since we extended this sprint by one additional week to make up for the long holidays last week.
- the agile practices you have used and their impact on your work
    - This week we weren't able to "slice the cake" as much as the week before. The frontend teams were dependent on the backend to be able to test their new features. It worked out fine at the end of the sprint but there was some downtime in the middle of it.
- the sprint review and how it relates to your scope and customer value (Did you have a PO, if yes, who?, if no, how did you carry out the review? Did the review result in a re-prioritisation of user stories? How did the reviews relate to your DoD? Did the feedback change your way of working?)
    - This review was our final review with our PO so it did not result in any re-prioritisation of user stories. Since we had already presented our MVP, which was accepted by PO, this sprint focused on extending our MVP. The PO seemed very satisfied with our work this sprint, and was especially eager to hear how the implementation of social media APIs worked and what functions they bring. The PO concluded that we were officially done with our project and expressed his gratitude for our work and we expressed our gratitude for the great guidance during the project.
